Capital Radio Club
Conversation Net
K6SAC
Monday Night 7:30pm
W6YDD Tone 2 repeater, in Georgetown atop Bald Mountain, 146.625 (-) CTCSS 123.00

PREPARE

Day Before the Net

Select at least one activity for this week's Net (simplex test, club announcements, trivia, tech conversation, contest info, ARRL updates, weather, or any amateur radio topic).

60 Minutes Before the Net

A) Check the front page of the club's website and calendar: <u>Capital Radio Club Calendar</u>
B) Set out Roll Call names and call sign documents (or software).
C) Be prepared to log guest names and call signs.
D) Have pen and paper ready.
E) Check your radio station, frequency, and power settings.

PRE-NET

<10 Minutes Before the Net>

"This is <your name and call sign>. In ten minutes, on the W6YDD repeater system, I will begin the weekly K6SAC Capital Radio Club Conversation Net. This Net occurs every Monday night at 7:30pm. Is there any emergency traffic or questions at this time?"

<5 Minutes Before the Net>

"This is <your name and call sign>, Net Control Operator for this evening's Net. In five minutes, on the W6YDD repeater system, I will begin the weekly K6SAC Capital Radio Club Conversation Net. This Net occurs every Monday night at 7:30pm. Are there any questions, or stations needing an early check-in such as mobile stations? Please come now."

MONDAY 7:30pm, START NET

"Welcome to the K6SAC Capital Radio Club Weekly Conversation Net. This Net occurs every Monday night at 7:30pm on the W6YDD repeater system. This is <your name and call sign>, your Net Control Station. Are there any stations with emergency traffic?"

<pause>

"We would like to thank the W6YDD Yabba-Dabba-Do Club for the use of this repeater, as well as Glenn Maclean WA7SPY and Kim Scheidel KE6RKX, trustees of this repeater system. There are three repeaters on this frequency operating independently at different locations. By request, participants in this Net typically use the Tone 2 repeater with a CTCSS tone of 123.00, which operates the Georgetown

repeater atop Bald Mountain. Although Tone 2 is preferred, you are welcome to use any of the W6YDD repeaters on this frequency."

"We invite all licensed amateur radio operators to participate in this evening's Net. This is a directed Net, meaning all traffic should be directed to Net Control — which this evening is me, <your name and call sign>. Appropriate traffic includes announcements, technical discussion, ham swap listings, trivia, weather, or any amateur radio information."

Before beginning check-ins, are there any questions or announcements?

Check-Ins

<Perform Roll Call>

<Ask> Are their any Guest Stations with us this evening, please come with your name and call?

<Ask> Are their any Late or Missed Stations?

Traffic

<Call those who said they are Mobile or needed an early check in>
"Do you have anything to share?"

<Announcements From Net Control>
"This is <your name and call sign>, your Net Control Operator. Licensed amateur radio operators who check into this Net two or more times in a month are entered into a monthly drawing for a new HT radio. That's right — a new HT is given away every month to a regular participant, and that person could be you!"

<Call> Aaron Jones , K6ABJ, do you have any reports for this evening's Net?

<Call Specific Stations with Announcement>

<Call, Stations who Checked In>
"Do you have anything to share?"

Tonight's Activity

(Simplex test, trivia, tech talk, ham swap listings, weather, or other amateur radio topic.)

Closure

<Ask> Are their any other questions, comments, or suggestions before ending tonight's Net?

<Ask> Are their any Late Operators or Other Stations who would like to Check-In?

END NET

"Okay, that was last call. I will now close the Net. The club thanks you for your participation. We again thank the Yabba-Dabba-Do W6YDD Club and trustees Glenn Maclean WA7SPY and Kim Scheidel KE6RKX for the use of this repeater system.

For information about the Capital Radio Club, please visit K6SAC.org or our QRZ page under call K6SAC. We are a new club and welcome all licensed amateur radio operators in the greater Sacramento area. There is no membership fee, and those who join now are considered Founding Members.

This Net meets every Monday at 7:30pm on the W6YDD repeater system. T

As an additional note, the primary purpose of the W6YDD system is to support the Tevis Cup and Western States Endurance Run events. During these events or when they are performing testing exercises, this K6SAC Net will use a different repeater.

This is <your name and call sign>. The Net is now officially closed, and the frequency may return to normal operations."

AFTER NET REPORTING

Type, save and send a report of the net and its attendees to the club's Net Operations Manager.
